

# David Bastian .

## About

Originally from Chile, I am a Designer and Web Developer based in New Zealand, I love to concept and design minimal and creative interfaces.

I work in multiples disciplines including Interactive Design, Illustration, Web Development, Art Direction and Photography. The importance of the message as the axis of the communication.  
For each project I always choose the one that have the biggest impact.

I believe in the value of a good idea. In changing fashion trends.

It is not enough look the web as a piece of design, Also need its comprehension and a deep knowledge of the Social & Cultural Environment, History of Art, Composition & Color Theory.  
The web is a creative space where the equation of all these areas is possible.

"The rules haven't changed, just have evolved with the technology"

## Experience

2016 - Today	<b>Interactive Designer, Illustrator &amp; Web Developer</b> <i>Resn</i>  Interfaces Design, Look & Feel Direction, Illustration in print and digital environments, experimenting and prototyping with new and common technologies in Javascript like AR, Canvas 2D and 3D, Shopify API, Wordpress Rest API, ES6.
