Hi!

It's great to meet you! I really admire Canonical's vision, especially the idea of engaging the open source community. I was immediately excited when I came across this application, and I wanted to introduce myself as a potential candidate for the position of Design Director.

Based in the Netherlands, I have several years of experience in various fields, from 3D design and product design to branding, creative direction, and web development. Over the years, I've cultivated a diverse skill set that allows me to handle a wide range of tasks.

You can explore some of my recent work on my portfolio at [Portfolio Link](#). As you can see, I've been deeply involved in the ideation, conceptualization, and 3D design phases of projects. Additionally, I'm proficient in Figma design and have hands-on experience with development using cutting-edge technologies like Next.js, Vercel, and TypeScript. I've also integrated various Google APIs, such as Calendar and Gmail, along with Stripe for seamless payment processing. My development work often involves Tailwind CSS and Supabase for efficient coding and database management.

However, I'm not just about the technical aspects. As a business owner [Zolviz.com](#), I've built my enterprise from the ground up. This experience has honed my skills in ideation, conceptualization, and thesis development. I've even created detailed investor decks to secure funding for my ventures.

With over 15 years of experience in roles spanning directorship, design, and development, I've received recognition through multiple awards, including Cannes, Awwwards, FWA Awards, and Webby Awards. I've also been nominated as Designer of the Year on digital platforms like CSS Awwwards.

My professional journey has taken me to some of the world's leading companies, including Google, Adidas, Nike, Apple, Netflix, BMW, Mini, Coca-Cola, Microsoft, Mailchimp, Braun, Fox, Estee Lauder, Samsung, Redbull, Puma, and many others.

What makes this opportunity particularly exciting for me is Canonical's background with Ubuntu/Linux, something I've been passionate about since my teenage years. Working with one of the brands I've always admired would be a dream come true. I'm excited about the opportunity to bring my extensive skill set, creative vision, and business acumen to Canonical. I would be more than happy to take on freelance or contract work, which aligns with my ideal scenario.

Thank you for considering my application. I appreciate your time and hope you have an amazing week.
P.S. You can also learn more about my recent venture, Zolviz, at [Zolviz.com](#).

Sincerely,
David Bastian
